Anti dustmite
Mosquito Protection keeps your mattress cover free from fungus, bacteria and house dust mite. Helps prevent health problems.

Allround
A finish or treatment that is applicable on all mattress fabrics in the DesleeClama range or which is applicable on most of the range.

Consumer benefits

Protected nights thanks to Mosquito Protection

Healthguard Mosquito Protection not only keeps out mosquitoes and other annoying insects, it also offers protection against dust mite and keeps the mattress cover free from fungus and bacteria.

A good night's rest has an extremely positive influence on our daily activities. But what happens when this invigorating night's sleep has been disturbed by the irritating buzzing of a mosquito and we have to go through all kinds of precarious positions to kill the creature? A mosquito buzzing around your room is not just extremely annoying, an apparently innocent bite can also have serious consequences. Just think of serious infections, allergic reactions or even malaria! We must stop the mosquitoes. DesleeClama now has an extremely effective solution: the Healthguard Mosquito Protection, a unique and revolutionary application for your mattress cover developed by Healthguard. Healthguard Mosquito Protection also protects against house mite and keeps the mattress cover free from fungus and bacteria. It is precisely because it fully protects against dust mites that this mattress cover is highly recommended for people suffering from asthma, sinus infections, eczema, hay fever and other allergies. In a society where everyone is interested in healthy living, an invigorating night's sleep is also important. Healthguard Mosquito Protection was initially intensively used in travel clothes and camping equipment such as tents, sleeping bags and mosquito nets. The product proved its effectiveness in these fields of application. Not only did the risk of being bitten by mosquitoes and contracting malaria drop drastically, other insects and animals also stayed away. DesleeClama had been looking for such an effective and environmentally-friendly solution for quite some time. Healthguard Mosquito Protection not only contributes to improving your sleeping comfort, but also to better health and a better sleep environment, free from mosquitoes and other vermin. Healthguard Mosquito Protection also protects you from an entire army of invisible 'enemies'.

Added values

> Rids you of all vermin

Mosquito Protection is a unique and revolutionary application for the mattress cover. It keeps mosquitoes and other annoying insects away from the sleeping environment and also protects you against house dust mite whose excrements can trigger allergic reactions. Anti Acaria is therefore highly recommended for people suffering from asthma, sinus infections, eczema, hay fever and other allergies. Mosquito Protection also keeps your mattress cover free from fungus and bacteria.

> Efficient

Mosquito Free is a highly effective solution for keeping annoying creatures away from your sleeping environment. Mosquito Protection does not release any volatile organic components, and is absolutely harmless for the human body. Mosquito Protection retains its effectiveness after frequent washing and is indeed a durable product that remains effective throughout the life of the mattress. Mosquito Protection is also effective without direct contact as the treatment creates a clean environment around the mattress.

> Ökotex 100 norm

Mattress covers with Mosquito Free drastically reduce the risk of mosquito bites in the sleeping environment, reduce the house dust mite colony by 99% and offer protection against numerous bacteria and fungi. Mosquito Protection is the only comparable product on the market to meet the stringent Ökotex standard and thus complies with the most recent requirements in respect of health and hygiene.

HealthGuard™ Mosquito Protection

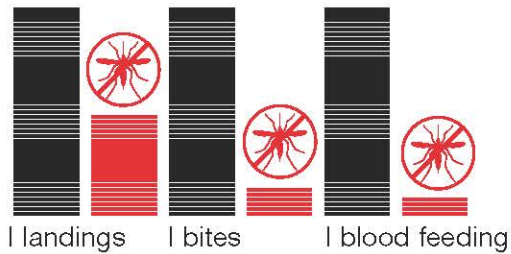

Scientific tests have shown that **Healthguard Mosquito Protection** reduced dust mite colonies by **99%** and that it also provides **efficient protection against 644 different bacteria and fungi, including dangerous micro-organisms such as MSRA and Escheria Coli.**

HealthGuard™ Vital Protection

The effectiveness of Healthguard Mosquito Protection has been intensively tested and proven by numerous independent research centres such as:

- > The London School of Hygiene and Tropical Medicine, UK
- > School of Public Health and Tropical Medicine, Australia
- > The UK National Health Service
- > Faculty of Medicine, Chinese University of Hong Kong
